Footnote:

** ND = not detectable. The measured value was below the limit of detection of 0.01% or 100 mg/kg.
The sum of the measured values is not necessarily equal to the sum of the individual values. The uncertainty varies with substance and concentration and can be assumed to be a maximum of 5%.
For the calculations of the equivalent sums, the respective acid forms were multiplied by the factor 0.877 or 0.878 to conclude the equivalent neutral form.
Method of analysis: HPLC-DAD (High Performance Liquid Chromatography - Diode Array Detector) according to Ph.Eur. 2.2.29 (European Pharmacopoeia).
This Certificate of Analysis may only be reproduced as a whole and not in parts. Any alteration is punishable under § 223 StGB (Austrian Penal Code) (forgery of documents).
